PERFORMANCE GUIDE

Healing & Restoration Progression

WEEKS 1–2

Many users notice early gastric calm — reduced burning after meals, better food tolerance, and less heaviness in the stomach.

WEEKS 3–4

Stomach comfort steadies, digestion becomes more reliable, and post-meal irritation eases noticeably.

WEEKS 5–8

Stomach-lining support compounds — calmer acid balance, fewer flare-ups, and stronger digestive confidence throughout the day.

WEEKS 9–12 +

A long-term gastric-wellness rhythm — sustained stomach comfort, balanced acid, and resilient digestive restoration.

EXPECTED TIMELINE · *Results vary depending on lifestyle, nutrition, hydration, and consistency.*
